What's happening in tech? #10: 22/08/2024

Today's prominence

- **1994 - The First Public Release of Java (Oak):** Sun Microsystems publicly announced the Oak programming language, which was later renamed Java. This language played a crucial role in the development of web applications and enterprise software.
- **1995 - Windows 95 Launched:** On August 22, 1995, Microsoft released Windows 95, a significant update to the Windows operating system. It introduced the Start menu, taskbar, and other features that became standard in later versions of Windows.
- **1996 - Release of Internet Explorer 3.0:** Microsoft released Internet Explorer 3.0, which was the first version to support Cascading Style Sheets (CSS), making it a significant step forward in web development.
- **2006 - Launch of Twitter**: Although the exact date Twitter was launched is debated, the service went public in July 2006, and by August, it started gaining significant traction. Twitter became one of the most influential social media platforms.
